

I do a lot of travelling for work and have subscribed to XM Satellite Radio for over a year. I frequently use the traffic and weather services in my travels and feel that the deletion of these services would be detrimental to many other motorists, especially those who drive for a living. I thoroughly enjoy listening to several different channels and as a paying customer I feel that I am entitled to receive these services. This act of censorship is unnecessary. Please reject the NAB's petition 04-160. Thank you for listening and for your consideration.
